ab155089

Anti-FABP12 antibody [EPR10536]

Recombinant | RabMAb

Key facts

Isotype	IgG
Host species	Rabbit
Storage buffer	pH: 7.2 - 7.4 Preservative: 0.01% Sodium azide Constituents: PBS, 40% Glycerol (glycerin, glycerine), 0.05% BSA
Form	Liquid
Clonality	Monoclonal
Immunogen	The exact immunogen used to generate this antibody is proprietary information.
Clone number	EPR10536
Purification technique	Affinity purification Protein A
Concentration	0.369 mg/mL The concentration of this product may be batch-dependent Batch concentration finder →

Reactivity data

WB

Tested

Species	Human
Dilution info	1/1000 - 1/10000
Notes	-

Species	Rat

Dilution info	1/1000 - 1/10000
Notes	-

Species	Mouse
Dilution info	1/1000 - 1/10000
Notes	-

IHC-P

Not recommended

Species	Mouse, Rat, Human
Dilution info	-
Notes	-

ICC/IF

Tested

Species	Human
Dilution info	1/50 - 1/100
Notes	-

Expected

Species	Rat, Mouse
Dilution info	Use at an assay dependent concentration.
Notes	-

Flow Cyt (Intra)

Tested

Species	Human
Dilution info	1/10 - 1/100
Notes	ab172730 - Rabbit monoclonal IgG, is suitable for use as an isotype control with this antibody.

Expected

Species	Rat, Mouse
Dilution info	Use at an assay dependent concentration.
Notes	-

Target data

See full target information Fatty acid-binding protein 12

Function	May play a role in lipid transport.

Storage

Shipped at conditions	Conditional Ambient
Appropriate short-term storage conditions	+4°C
Appropriate long-term storage conditions	-20°C

Notes

Patented technology
Our RabMAb® technology is a patented hybridoma-based technology for making rabbit monoclonal antibodies. For details on our patents, please refer to RabMAb® patents.

What are the advantages of a recombinant monoclonal antibody?
This product is a recombinant monoclonal antibody, which offers several advantages including:

- High batch-to-batch consistency and reproducibility
- Improved sensitivity and specificity
- Long-term security of supply
- Animal-free batch production

For more information, read more on recombinant antibodies.

Supplementary info

This supplementary information is collated from multiple sources and compiled automatically.

Activity summary	FABP12 also known as fatty acid-binding protein 12 plays a role in lipid transport and metabolism. This protein facilitates the binding and transport of long-chain fatty acids within cells. Although its exact molecular weight is not universally established similar fatty acid-binding proteins often have masses around 14-15 kDa. FABP12 expression primarily occurs in the mammalian retina with detectable levels in other tissues including certain types of cancer tissues.
Biological function summary	FABP12 influences cellular processes through its interaction with lipids. This protein contributes to fatty acid uptake and intracellular lipid homeostasis. It does not function as part of a larger macromolecular complex but interacts dynamically with fatty acids impacting lipid signaling and energy balance within the cell. Through these interactions FABP12 supports cellular energy production and lipid storage regulation.
Pathways	FABP12 is involved in lipid metabolism and energy homeostasis pathways. One important pathway includes the peroxisome proliferator-activated receptor (PPAR) signaling pathway which regulates lipid metabolism. Nearby proteins like PPAR-alpha and PPAR-gamma are important for FABP12's regulation of lipid-derived energy. Another relevant connection is to the retinoic acid signaling pathway where FABP12's binding affinity with retinoids potentially influences cellular differentiation and development.
Associated diseases and disorders	Research connects FABP12 to cancer and metabolic syndromes. In some cancers altered expression levels of FABP12 appear to influence tumor growth and metabolism. Studies have linked FABP12 with proteins such as FABP5 another member of the fatty acid-binding protein family in cancerous tissue dynamics. Additionally FABP12 involvement in metabolic disorders suggests a relationship with insulin resistance where its expression may impact the function of key proteins related to glucose metabolism.

Product promise

Tested

We have tested this species and application combination and it works. It is covered by our product promise.

Expected

We have not tested this specific species and application combination in-house, but expect it will work. It is covered by our product promise.

Predicted

This species and application combination has not been tested, but we predict it will work based on strong homology. However, this combination is not covered by our product promise.

Not recommended

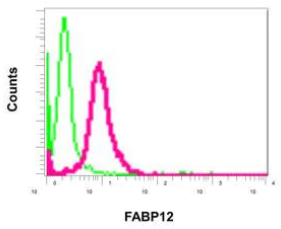

We do not recommend this combination. It is not covered by our product promise.

We are dedicated to supporting your work with high quality reagents and we are here for you every step of the way should you need us.

In the unlikely event of one of our products not working as expected, you are covered by our product promise.

Full details and terms and conditions can be found here:
Terms & Conditions.

Flow Cytometry (Intracellular) - Anti-FABP12 antibody [EPR10536] (ab155089)

FABP12 Flow Cytometry (Intracellular) staining using rabbit Anti-FABP12 antibody

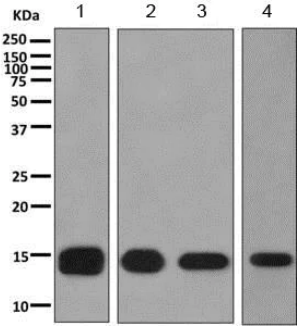

Intracellular flow cytometric analysis of permeabilized Jurkat cells, labeling FABP12 with ab155089 at 1/10 dilution (red) compared with a Rabbit IgG control (green).

Immunocytochemistry/ Immunofluorescence - Anti-FABP12 antibody [EPR10536] (ab155089)

FABP12 Immunocytochemistry/ Immunofluorescence staining using rabbit Anti-FABP12 antibody

Immunofluorescent analysis of Jurkat cells labeling FABP12 with ab155089 at 1/50 dilution.

Western blot - Anti-FABP12 antibody [EPR10536] (ab155089)

All lanes:
Western blot - Anti-FABP12 antibody [EPR10536] (ab155089) at 1/1000 dilution

Lane 1:
Rat eyeball tissue lysate at 10 µg

Lane 2:
Mouse eyeball lysate at 10 µg

Lane 3:
Human fetal brain tissue lysate at 10 µg

Lane 4:
Jurkat cell lysate at 10 µg

Secondary

All lanes:
Goat anti-rabbit HRP at 1/2000 dilution

Predicted band size: 16 kDa

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
