ab181994

Anti-RWDD1 antibody [EPR13715(B)]

Recombinant | RabMAb

Key facts

Isotype	IgG
Host species	Rabbit
Storage buffer	Preservative: 0.01% Sodium azide Constituents: PBS, 40% Glycerol (glycerin, glycerine), 0.05% BSA
Form	Liquid
Clonality	Monoclonal
Immunogen	The exact immunogen used to generate this antibody is proprietary information.
Clone number	EPR13715(B)
Purity	Tissue culture supernatant

Reactivity data

IP

Tested

Species	Human
Dilution info	1/60
Notes	-

Predicted

Species	Mouse, Rat

Dilution info	-
Notes	-

WB

Tested

Species	Human
Dilution info	1/10000 - 1/50000
Notes	-

Predicted

Species	Mouse, Rat
Dilution info	-
Notes	-

Flow Cyt (Intra)

Tested

Species	Human
Dilution info	1/10
Notes	ab172730 - Rabbit monoclonal IgG, is suitable for use as an isotype control with this antibody.

Predicted

Species	Mouse, Rat
Dilution info	-
Notes	-

Target data

See full target information RWDD1

Function	Protects DRG2 from proteolytic degradation (By similarity). May function as a coactivator of the AR/androgen receptor transcription factor during development

(PubMed:22406838).

Storage

Shipped at conditions	Conditional Ambient
Appropriate short-term storage duration	1-2 weeks
Appropriate short-term storage conditions	+4°C
Appropriate long-term storage conditions	-20°C
Aliquoting information	Upon delivery aliquot
Storage information	Avoid freeze / thaw cycle

Notes

Patented technology
Our RabMAb® technology is a patented hybridoma-based technology for making rabbit monoclonal antibodies. For details on our patents, please refer to RabMAb® patents.

What are the advantages of a recombinant monoclonal antibody?
This product is a recombinant monoclonal antibody, which offers several advantages including:

- High batch-to-batch consistency and reproducibility
- Improved sensitivity and specificity
- Long-term security of supply
- Animal-free batch production

For more information, read more on recombinant antibodies.

Supplementary info

This supplementary information is collated from multiple sources and compiled automatically.

Activity summary	RWDD1 also known as RWD domain-containing protein 1 is a protein with a molecular mass of approximately 12 kDa. This protein is expressed in various tissues including the brain liver and kidney. Mechanically RWDD1 interacts with other proteins through its RWD domain which is a conserved region facilitating protein-protein interactions. This domain helps RWDD1 participate in cellular processes by serving as a regulatory subunit in protein complexes.
Biological function summary	RWDD1 influences cellular activities due to its role in modulating protein degradation pathways. It is part of protein complexes that are involved in tagging

	proteins for degradation. This modulation affects many cellular processes such as cell cycle control and stress responses. The protein may work closely with proteasomal subunit proteins suggesting it has a specific function in maintaining cellular protein homeostasis.
Pathways	RWDD1 is actively involved in the ubiquitin-proteasome system which is a significant pathway for protein degradation. It interacts with proteins involved in ubiquitination processes which tag proteins for breakdown. Additionally RWDD1 plays a role in cellular response pathways to oxidative stress through associations with proteins like Nrf2 a well-known regulator of the antioxidant response.
Associated diseases and disorders	Dysregulation of RWDD1 may link to cancer and neurodegenerative diseases. Abnormal RWDD1 function can lead to impaired protein degradation contributing to the accumulation of damaged or misfolded proteins a common feature in these conditions. Associations with proteins such as p53 in cancer and links to tau proteins in Alzheimer's disease highlight its potential involvement in disease mechanisms.

Product promise

Tested

We have tested this species and application combination and it works. It is covered by our product promise.

Expected

We have not tested this specific species and application combination in-house, but expect it will work. It is covered by our product promise.

Predicted

This species and application combination has not been tested, but we predict it will work based on strong homology. However, this combination is not covered by our product promise.

Not recommended

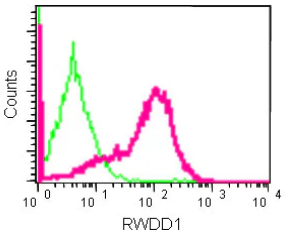

We do not recommend this combination. It is not covered by our product promise.

We are dedicated to supporting your work with high quality reagents and we are here for you every step of the way should you need us.

In the unlikely event of one of our products not working as expected, you are covered by our product promise.

Flow Cytometry (Intracellular) - Anti-RWDD1 antibody [EPR13715(B)] (ab181994)

RWDD1 Flow Cytometry (Intracellular) staining using rabbit Anti-RWDD1 antibody

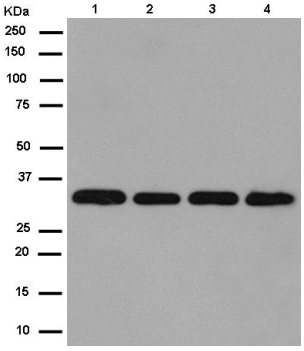

Intracellular flow cytometric analysis of 2% paraformaldehyde-fixedHelacells labeling RWDD1with ab181994at a 1/10 dilution, or with rabbit IgG isotype control. Goat anti rabbit IgG (FITC) at a 1/150 dilutionwas used as a secondary antibody.

Immunoprecipitation - Anti-RWDD1 antibody [EPR13715(B)] (ab181994)

Immunoprecipitation of Jurkat labeling RWDD1 using ab181994 at a 1/60 dilution (lane 1). Lane 2 shows the negative control. Anti-Rabbit IgG (HRP), specific to the non-reduced form of IgG, was used as a secondary antibody at a dilution of 1/1500. Blocking/dilution buffer and concentration: 5% NFDM/TBST
All lanes:
Immunoprecipitation - Anti-RWDD1 antibody [EPR13715(B)] (ab181994)

Predicted band size: 28 kDa

Western blot - Anti-RWDD1 antibody [EPR13715(B)] (ab181994)

RWDD1 Western blot staining using rabbit Anti-RWDD1 antibody

All lanes:
Western blot - Anti-RWDD1 antibody [EPR13715(B)] (ab181994) at 1/50000 dilution

Lane 1:
Jurkat cell lysate at 20 µg

Lane 2:
Hela cell lysate at 20 µg

Lane 3:
293 cell lysate at 20 µg

Lane 4:
A673 cell lysate at 20 µg

Secondary

All lanes:
Goat Anti-Rabbit IgG, (H+L), Peroxidase conjugated at 1/1000 dilution

Predicted band size: 28 kDa

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
