ab233830

Anti-IL-9R antibody [1C2A6]

Mouse Monoclonal IL-9R antibody. Suitable for Flow Cyt, WB and reacts with Human samples. Cited in 1 publication. Immunogen corresponding to Recombinant Fragment Protein within Human IL9R aa 1-300.

Image updates are in progress. Products remain available and covered by the Abcam Product Promise. Learn more.

Key facts

Isotype	IgG1
Host species	Mouse
Storage buffer	Preservative: 0.05% Sodium azide Constituents: PBS
Form	Liquid
Clonality	Monoclonal
Immunogen	Recombinant Fragment Protein within Human IL9R aa 1-300. The exact immunogen used to generate this antibody is proprietary information. Database link Q01113
Clone number	1C2A6
Purification technique	Affinity purification Protein G
Concentration	1 mg/mL The concentration of this product may be batch-dependent Batch concentration finder →
Purification notes	Purified from tissue culture supernatant.

Reactivity data

Flow Cyt

Tested

Species	Human
Dilution info	1/200 - 1/400
Notes	-

WB

Tested

Species	Human
Dilution info	1/500 - 1/2000
Notes	-

Target data

See full target information IL9R

Function	Plays an important role in the immune response against parasites by acting as a receptor of IL9.

Storage

Shipped at conditions	Blue Ice
Appropriate short-term storage duration	1-2 weeks
Appropriate short-term storage conditions	+4°C
Appropriate long-term storage conditions	-20°C
Aliquoting information	Upon delivery aliquot
Storage information	Avoid freeze / thaw cycle

Supplementary info

This supplementary information is collated from multiple sources and compiled automatically.

Activity summary	Interleukin 9 receptor (IL-9R) also known as CD129 is a transmembrane protein that belongs to the cytokine receptor family. It weighs approximately 54 kDa. IL-9R

	is expressed on various cell types including T cells B cells mast cells and certain epithelial cells. This receptor primarily binds to interleukin 9 (IL-9) and forms a heterodimer with the common gamma chain a component shared with other interleukin receptors.
Biological function summary	IL-9R plays essential roles in immune system signaling and regulation. As part of a receptor complex it activates downstream signaling pathways upon IL-9 binding influencing the immune responses such as cell survival proliferation and differentiation. IL-9R is also known to modulate allergic inflammation and has effects on both innate and adaptive immune responses.
Pathways	Research indicates that IL-9R is a participant in the JAK/STAT signaling pathway. This pathway includes janus kinase 1 (JAK1) and signal transducer and activator of transcription 5 (STAT5) both important for transmitting signals from IL-9 to exert cellular effects. IL-9R also connects to pathways involving other immune-modulating interleukins suggesting its broad role in immune regulation.
Associated diseases and disorders	IL-9R holds a significant relationship with asthma and allergic diseases. It plays a role in promoting inflammatory responses in the airways related to conditions like asthma. Moreover IL-9R has connections with IL-13 in the context of allergic inflammation and this interaction may amplify disease pathology. Understanding the dynamics of IL-9R could offer insights into therapeutic targets for managing such immune-related disorders.

Product promise

Tested

We have tested this species and application combination and it works. It is covered by our product promise.

Expected

We have not tested this specific species and application combination in-house, but expect it will work. It is covered by our product promise.

Predicted

This species and application combination has not been tested, but we predict it will work based on strong homology. However, this combination is not covered by our product promise.

Not recommended

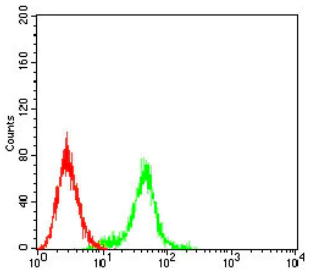

We do not recommend this combination. It is not covered by our product promise.

We are dedicated to supporting your work with high quality reagents and we are here for you every step of the way should you need us.

In the unlikely event of one of our products not working as expected, you are covered by our product promise.
