ab249361

Anti-Stomatin antibody [EPR10421] - BSA and Azide free

Recombinant | RabMAb

Key facts

Isotype	IgG
Host species	Rabbit
Storage buffer	pH: 7.2 - 7.4 Constituents: PBS
Form	Liquid
Clonality	Monoclonal
Immunogen	The exact immunogen used to generate this antibody is proprietary information.
Carrier free	Yes
Clone number	EPR10421
Purification technique	Affinity purification Protein A
Concentration	1.019 mg/mL The concentration of this product may be batch-dependent Batch concentration finder →

Reactivity data

ICC/IF

Tested

Species	Human
Dilution info	-

Notes	-

Expected

Species	Mouse
Dilution info	Use at an assay dependent concentration.
Notes	-

Predicted

Species	Rat
Dilution info	-
Notes	-

IP

Tested

Species	Human
Dilution info	-
Notes	-

Expected

Species	Mouse
Dilution info	Use at an assay dependent concentration.
Notes	-

Predicted

Species	Rat
Dilution info	-
Notes	-

WB

Tested

Species	Human
Dilution info	-
Notes	-

Expected

Species	Mouse
Dilution info	Use at an assay dependent concentration.
Notes	-

Predicted

Species	Rat
Dilution info	-
Notes	-

IHC-P

Not recommended

Species	Mouse, Human, Rat
Dilution info	-
Notes	-

Flow Cyt (Intra)

Tested

Species	Mouse
Dilution info	-
Notes	-

Expected

Species	Human

Dilution info	Use at an assay dependent concentration.
Notes	-

Predicted

Species	Rat
Dilution info	-
Notes	-

Target data

See full target information STOM

Function	Regulates ion channel activity and transmembrane ion transport. Regulates ASIC2 and ASIC3 channel activity.

Storage

Shipped at conditions	Blue Ice
Appropriate short-term storage conditions	+4°C
Appropriate long-term storage conditions	+4°C
Storage information	Do Not Freeze

Notes

ab249361 is the carrier-free version of ab166623.

Patented technology

Our RabMAb® technology is a patented hybridoma-based technology for making rabbit monoclonal antibodies. For details on our patents, please refer to RabMAb® patents.

What are the advantages of a recombinant monoclonal antibody?

This product is a recombinant monoclonal antibody, which offers several advantages including:

- High batch-to-batch consistency and reproducibility
- Improved sensitivity and specificity
- Long-term security of supply
- Animal-free batch production

For more information, read more on recombinant antibodies.

Conjugation ready
Our carrier-free antibodies are typically supplied in a PBS-only formulation, purified and free of BSA, sodium azide and glycerol. This conjugation-ready format is designed for use with fluorochromes, metal isotopes, oligonucleotides, and enzymes, which makes them ideal for antibody labelling, functional and cell-based assays, flow-based assays (e.g. mass cytometry) and Multiplex Imaging applications.

Use our conjugation kits for antibody conjugates that are ready-to-use in as little as 20 minutes with 1 minute hands-on-time and 100% antibody recovery: available for fluorescent dyes, HRP, biotin and gold.

Compatibility
This product is compatible with the Maxpar® Antibody Labeling Kit from Fluidigm, without the need for antibody preparation. Maxpar® is a trademark of Fluidigm Canada Inc.

Product promise

Tested

We have tested this species and application combination and it works. It is covered by our product promise.

Expected

We have not tested this specific species and application combination in-house, but expect it will work. It is covered by our product promise.

Predicted

This species and application combination has not been tested, but we predict it will work based on strong homology. However, this combination is not covered by our product promise.

Not recommended

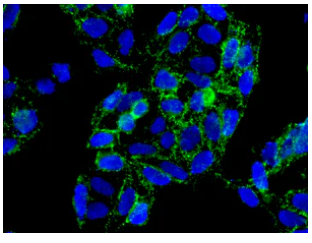

We do not recommend this combination. It is not covered by our product promise.

We are dedicated to supporting your work with high quality reagents and we are here for you every step of the way should you need us.

In the unlikely event of one of our products not working as expected, you are covered by our product promise.

Immunocytochemistry/ Immunofluorescence - Anti-Stomatin antibody [EPR10421] - BSA and Azide free (ab249361)

Stomatin Immunocytochemistry/ Immunofluorescence staining using rabbit Anti-Stomatin antibody

This data was developed using ab166623, the same antibody clone in a different buffer formulation.
Immunofluorescence analysis of HeLa cells labeling Stomatin with ab166623 at 1/100 dilution.

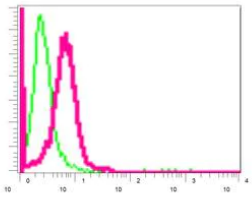

Immunoprecipitation - Anti-Stomatin antibody [EPR10421] - BSA and Azide free (ab249361)

This data was developed using ab166623, the same antibody clone in a different buffer formulation.
Immunoprecipitation of Stomatin in pellet from Human fetal heart lysate using ab166623 at 1/10 dilution, followed by western blot analysis of Stomatin.

All lanes:
Immunoprecipitation - Anti-Stomatin antibody [EPR10421] (ab166623) at 1/1000 dilution

All lanes:
immunoprecipitation pellet from Human fetal heart lysate at 10 µg

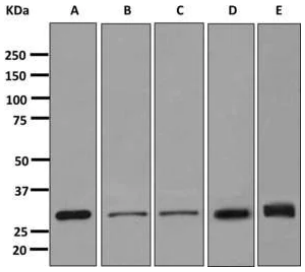

Predicted band size: 32 kDa

Flow Cytometry (Intracellular) - Anti-Stomatin antibody [EPR10421] - BSA and Azide free (ab249361)

Stomatin Flow Cytometry (Intracellular) staining using rabbit Anti-Stomatin antibody

This data was developed using ab166623, the same antibody clone in a different buffer formulation.
Intracellular flow cytometric analysis of permeabilized Neuro-2a cells using ab166623 (red) at 1/10 dilution or a rabbit IgG (negative) (green).

Western blot - Anti-Stomatin antibody [EPR10421] - BSA and Azide free (ab249361)

This data was developed using ab166623, the same antibody clone in a different buffer formulation.
All lanes:
Western blot - Anti-Stomatin antibody [EPR10421] (ab166623) at 1/1000 dilution

Lane 1:
Human fetal heart tissue lysate at 10 µg

Lane 2:
HeLa cell lysate at 10 µg

Lane 3:
HepG2 cell lysate at 10 µg

Lane 4:
Neuro-2a lysate at 10 µg

Lane 5:
RAW 264.7 cell lysate at 10 µg

Predicted band size: 32 kDa

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
