ab249463

Anti-PARM-1 antibody [EPR10009] - BSA and Azide free

Recombinant | RabMAb

Key facts

Isotype	IgG
Host species	Rabbit
Storage buffer	pH: 7.2 - 7.4 Constituents: PBS
Form	Liquid
Clonality	Monoclonal
Immunogen	The exact immunogen used to generate this antibody is proprietary information.
Carrier free	Yes
Clone number	EPR10009
Purification technique	Affinity purification Protein A
Concentration	1.022 mg/mL The concentration of this product may be batch-dependent Batch concentration finder →

Reactivity data

ICC/IF

Not recommended

Species	Human, Mouse, Rat
Dilution info	-

Notes	-

IP

Tested

Species	Human
Dilution info	-
Notes	-

Predicted

Species	Mouse, Rat
Dilution info	-
Notes	-

WB

Tested

Species	Human

Notes	-

IHC-P

Not recommended

Species	Human, Mouse, Rat
Dilution info	-
Notes	-

Flow Cyt (Intra)

Tested

Species	Human
Dilution info	-
Notes	-

Predicted

Species	Mouse, Rat
Dilution info	-
Notes	-

Target data

See full target information PARM1

Function	May regulate TLP1 expression and telomerase activity, thus enabling certain prostatic cells to resist apoptosis.

Storage

Shipped at conditions	Blue Ice
Appropriate short-term storage conditions	+4°C
Appropriate long-term storage conditions	+4°C
Storage information	Do Not Freeze

Notes

ab249463 is the carrier-free version of ab168369.

Patented technology

Our RabMAb® technology is a patented hybridoma-based technology for making rabbit monoclonal antibodies. For details on our patents, please refer to RabMAb® patents.

What are the advantages of a recombinant monoclonal antibody?

This product is a recombinant monoclonal antibody, which offers several advantages including:

- High batch-to-batch consistency and reproducibility
- Improved sensitivity and specificity
- Long-term security of supply
- Animal-free batch production

For more information, read more on recombinant antibodies.

Conjugation ready
Our carrier-free antibodies are typically supplied in a PBS-only formulation, purified and free of BSA, sodium azide and glycerol. This conjugation-ready format is designed for use with fluorochromes, metal isotopes, oligonucleotides, and enzymes, which makes them ideal for antibody labelling, functional and cell-based assays, flow-based assays (e.g. mass cytometry) and Multiplex Imaging applications.

Use our conjugation kits for antibody conjugates that are ready-to-use in as little as 20 minutes with 1 minute hands-on-time and 100% antibody recovery: available for fluorescent dyes, HRP, biotin and gold.

Compatibility
This product is compatible with the Maxpar® Antibody Labeling Kit from Fluidigm, without the need for antibody preparation. Maxpar® is a trademark of Fluidigm Canada Inc.

Product promise

Tested

We have tested this species and application combination and it works. It is covered by our product promise.

Expected

We have not tested this specific species and application combination in-house, but expect it will work. It is covered by our product promise.

Predicted

This species and application combination has not been tested, but we predict it will work based on strong homology. However, this combination is not covered by our product promise.

Not recommended

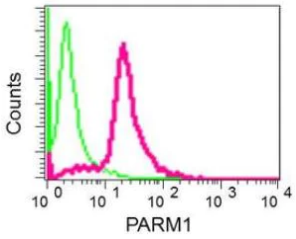

We do not recommend this combination. It is not covered by our product promise.

We are dedicated to supporting your work with high quality reagents and we are here for you every step of the way should you need us.

In the unlikely event of one of our products not working as expected, you are covered by our product promise.

Flow Cytometry (Intracellular) - Anti-PARM-1 antibody [EPR10009] - BSA and Azide free (ab249463)

PARM-1 Flow Cytometry (Intracellular) staining using rabbit Anti-PARM-1 antibody

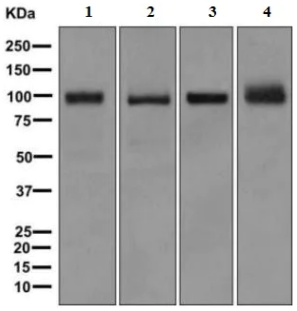

This data was developed using ab168369, the same antibody clone in a different buffer formulation.
Intracellular flow cytometric analysis of permeabilized 293 cells using ab168369 at a 1/10 dilution (red) or a rabbit IgG (negative) (green).

Immunoprecipitation - Anti-PARM-1 antibody [EPR10009] - BSA and Azide free (ab249463)

This data was developed using ab168369, the same antibody clone in a different buffer formulation.Western blot analysis on pellet from 293 cell lysate immunoprecipitated using ab168369 at a 1/100 dilution, and HRP-conjugated anti-rabbit IgG.
All lanes:
Immunoprecipitation - Anti-PARM-1 antibody [EPR10009] (ab168369)

Predicted band size: 32 kDa

Western blot - Anti-PARM-1 antibody [EPR10009] - BSA and Azide free (ab249463)

This data was developed using ab168369, the same antibody clone in a different buffer formulation.
All lanes:
Western blot - Anti-PARM-1 antibody [EPR10009] (ab168369) at 1/1000 dilution

Lane 1:
Human placenta lysate at 10 µg

Lanes 2 - 3:
Fetal kidney tissue lysate at 10 µg

Lane 4:
293T (Human embryonic kidney epithelial cell) cell lysate at 10 µg

Predicted band size: 32 kDa

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
