ab249881

Anti-BPI antibody [EPR12350(B)] - BSA and Azide free

Recombinant | RabMAb

Key facts

Isotype	IgG
Host species	Rabbit
Storage buffer	pH: 7.2 - 7.4 Constituents: PBS
Form	Liquid
Clonality	Monoclonal
Immunogen	The exact immunogen used to generate this antibody is proprietary information.
Carrier free	Yes
Clone number	EPR12350(B)
Purification technique	Affinity purification
Concentration	0.955 mg/mL The concentration of this product may be batch-dependent Batch concentration finder →

Target data

See full target information BPI

Function	The cytotoxic action of BPI is limited to many species of Gram-negative bacteria; this specificity may be explained by a strong affinity of the very basic N-terminal half for the negatively charged lipopolysaccharides that are unique to the Gram-negative bacterial outer envelope. Has antibacterial activity against the Gram-negative bacterium P.aeruginosa, this activity is inhibited by LPS from P.aeruginosa.

Storage

Shipped at conditions	Blue Ice
Appropriate short-term storage conditions	+4°C
Appropriate long-term storage conditions	+4°C
Storage information	Do Not Freeze

Notes

ab249881 is the carrier-free version of ab175231.

Patented technology

Our RabMAb® technology is a patented hybridoma-based technology for making rabbit monoclonal antibodies. For

details on our patents, please refer to RabMAb® patents.

What are the advantages of a recombinant monoclonal antibody?
This product is a recombinant monoclonal antibody, which offers several advantages including:

- High batch-to-batch consistency and reproducibility
- Improved sensitivity and specificity
- Long-term security of supply
- Animal-free batch production

For more information, read more on recombinant antibodies.

Conjugation ready
Our carrier-free antibodies are typically supplied in a PBS-only formulation, purified and free of BSA, sodium azide and glycerol. This conjugation-ready format is designed for use with fluorochromes, metal isotopes, oligonucleotides, and enzymes, which makes them ideal for antibody labelling, functional and cell-based assays, flow-based assays (e.g. mass cytometry) and Multiplex Imaging applications.

Use our conjugation kits for antibody conjugates that are ready-to-use in as little as 20 minutes with 1 minute hands-on-time and 100% antibody recovery: available for fluorescent dyes, HRP, biotin and gold.

Compatibility
This product is compatible with the Maxpar® Antibody Labeling Kit from Fluidigm, without the need for antibody preparation. Maxpar® is a trademark of Fluidigm Canada Inc.

Product promise

Tested

We have tested this species and application combination and it works. It is covered by our product promise.

Expected

We have not tested this specific species and application combination in-house, but expect it will work. It is covered by our product promise.

Predicted

This species and application combination has not been tested, but we predict it will work based on strong homology. However, this combination is not covered by our product promise.

Not recommended

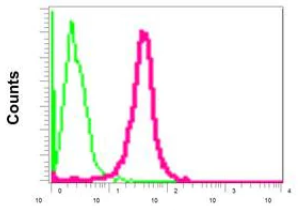

We do not recommend this combination. It is not covered by our product promise.

We are dedicated to supporting your work with high quality reagents and we are here for you every step of the way should you need us.

In the unlikely event of one of our products not working as expected, you are covered by our product promise.

Flow Cytometry (Intracellular) - Anti-BPI antibody [EPR12350(B)] - BSA and Azide free (ab249881)

BPI Flow Cytometry (Intracellular) staining using rabbit Anti-BPI antibody

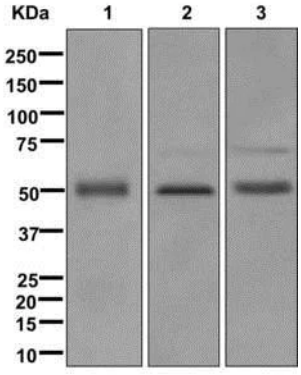

This data was developed using ab175231, the same antibody clone in a different buffer formulation.
Intracellular flow cytometrical analysis of permeabilized THP1 cells labeling BPI with ab175231 antibody at 1/100 (red) or a rabbit IgG (green).

Immunocytochemistry/ Immunofluorescence - Anti-BPI antibody [EPR12350(B)] - BSA and Azide free (ab249881)

BPI Immunocytochemistry/ Immunofluorescence staining using rabbit Anti-BPI antibody

This data was developed using ab175231, the same antibody clone in a different buffer formulation.
Immunofluorescent analysis of HL60 cells labeling BPI with ab175231 at 1/100 (red) and DAPI staining (blue).

Western blot - Anti-BPI antibody [EPR12350(B)] - BSA and Azide free (ab249881)

This data was developed using ab175231, the same antibody clone in a different buffer formulation.
All lanes:
Western blot - Anti-BPI antibody [EPR12350(B)] (ab175231) at 1/1000 dilution

Lane 1:
Human bone marrow lysate at 10 µg

Lane 2:
THP1 lysate at 10 µg

Lane 3:
HL60 lysate at 10 µg

Predicted band size: 54 kDa

Observed band size: 50-60 kDa

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
