ab250501

Anti-TIP30 antibody [EPR13185] - BSA and Azide free

Recombinant | RabMAb

Key facts

Isotype	IgG
Host species	Rabbit
Storage buffer	pH: 7.2 - 7.4 Constituents: PBS
Form	Liquid
Clonality	Monoclonal
Immunogen	The exact immunogen used to generate this antibody is proprietary information.
Carrier free	Yes
Clone number	EPR13185
Purification technique	Affinity purification
Concentration	1.012 mg/mL The concentration of this product may be batch-dependent Batch concentration finder →

Target data

See full target information HTATIP2

Function	Represses translation by preventing reactivation of elongation factor eEF1A (By similarity). May also inhibit nuclear import by competing with nuclear import substrates for binding to a subset of nuclear transport receptors (PubMed:15282309). Has additionally been proposed to act as a redox sensor involved in cellular oxidative stress surveillance (PubMed:18519672).

Storage

Shipped at conditions	Blue Ice
Appropriate short-term storage conditions	+4°C
Appropriate long-term storage conditions	+4°C
Storage information	Do Not Freeze

Notes

ab250501 is the carrier-free version of ab181378.

Species reactivity
Mouse, Rat: We have preliminary internal testing data to indicate this antibody may not react with these species. Please contact us for more information.

Patented technology
Our RabMAb® technology is a patented hybridoma-based technology for making rabbit monoclonal antibodies. For details on our patents, please refer to RabMAb® patents.

What are the advantages of a recombinant monoclonal antibody?
This product is a recombinant monoclonal antibody, which offers several advantages including:

- High batch-to-batch consistency and reproducibility
- Improved sensitivity and specificity
- Long-term security of supply
- Animal-free batch production

For more information, read more on recombinant antibodies.

Conjugation ready
Our carrier-free antibodies are typically supplied in a PBS-only formulation, purified and free of BSA, sodium azide and glycerol. This conjugation-ready format is designed for use with fluorochromes, metal isotopes, oligonucleotides, and enzymes, which makes them ideal for antibody labelling, functional and cell-based assays, flow-based assays (e.g. mass cytometry) and Multiplex Imaging applications.

Use our conjugation kits for antibody conjugates that are ready-to-use in as little as 20 minutes with 1 minute hands-on-time and 100% antibody recovery: available for fluorescent dyes, HRP, biotin and gold.

Compatibility
This product is compatible with the Maxpar® Antibody Labeling Kit from Fluidigm, without the need for antibody preparation. Maxpar® is a trademark of Fluidigm Canada Inc.

Supplementary info

This supplementary information is collated from multiple sources and compiled automatically.

Activity summary	TIP30 also known as HTATIP2 is a tumor suppressor protein that plays an important role in various cellular processes. It has a mass of approximately 30 kDa and is expressed in a range of human tissues including the liver lung and brain. TIP30 is an oxidoreductase and its activity involves the regulation of cellular responses to oxidative stress. It interacts with transcription factors and other proteins to modulate gene expression that is critical for cell growth and apoptosis.
Biological function summary	The TIP30 protein contributes to the regulation of gene transcription and the maintenance of cellular homeostasis. TIP30 is part of a complex that influences transcriptional activity by interacting with specific transcription factors. Its function suppresses oncogene activity and enhances the expression of genes that prevent tumor development. By controlling signaling pathways related to cell cycle and apoptosis TIP30 reinforces the protective mechanisms against cancer cell proliferation.
Pathways	TIP30 engages in important signaling pathways such as the PI3K/AKT pathway and the MAPK pathway where it acts to inhibit unwanted cell survival signals and tumorigenic processes. It interacts closely with proteins like AKT and ERK influencing their activity and ensuring appropriate responses to growth signals. TIP30 modulates cellular dynamics by regulating pathway fidelity which impacts cell survival proliferation and tumor suppression.
Associated diseases and disorders	TIP30 levels are notably altered in certain cancer types such as hepatocellular carcinoma and breast cancer. These disorders correlate with its role in inhibiting tumor progression. Proteins such as c-MYC and ERBB2 often show varied expression in relation to TIP30 suggesting significant links in pathways leading to tumor growth. By investigating TIP30 involvement in these conditions researchers hope to identify potential therapeutic avenues that could restore its tumor suppressor function and curb cancer development.

Product promise

Tested

We have tested this species and application combination and it works. It is covered by our product promise.

Expected

We have not tested this specific species and application combination in-house, but expect it will work. It is covered by our product promise.

Predicted

This species and application combination has not been tested, but we predict it will work based on strong homology. However, this combination is not covered by our product promise.

Not recommended

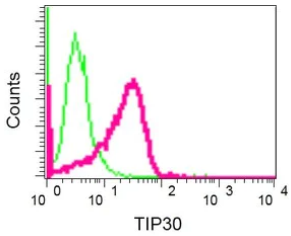

We do not recommend this combination. It is not covered by our product promise.

We are dedicated to supporting your work with high quality reagents and we are here for you every step of the way should you need us.

In the unlikely event of one of our products not working as expected, you are covered by our product promise.

Flow Cytometry (Intracellular) - Anti-TIP30 antibody [EPR13185] - BSA and Azide free (ab250501)

TIP30 Flow Cytometry (Intracellular) staining using rabbit Anti-TIP30 antibody

This data was developed using ab181378, the same antibody clone in a different buffer formulation.
Intracellular flow cytometric analysis of permeabilized HeLa cells (red) labeling TIP30 with ab181378 at 1/10 dilution (red), compared to a rabbit IgG negative control (green).

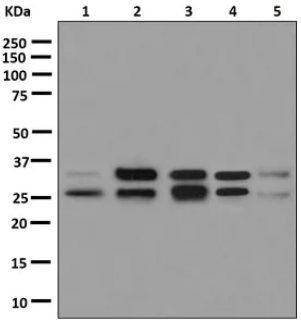

Immunoprecipitation - Anti-TIP30 antibody [EPR13185] - BSA and Azide free (ab250501)

This data was developed using ab181378, the same antibody clone in a different buffer formulation.
Western blot analysis on immunoprecipitation pellet from A431 cell lysate labeling TIP30 with ab181378 at 1/10 dilution (Lane 1). Lane 2 is 1XPBS (negative control). Detection with HRP-conjugated anti-rabbit IgG, detecting the non-reduced form of rabbit IgG.

All lanes:
Immunoprecipitation - Anti-TIP30 antibody [EPR13185] (ab181378)

Predicted band size: 27 kDa

Western blot - Anti-TIP30 antibody [EPR13185] - BSA and Azide free (ab250501)

This data was developed using ab181378, the same antibody clone in a different buffer formulation.
All lanes:
Western blot - Anti-TIP30 antibody [EPR13185] (ab181378) at 1/10000 dilution

Lane 1:
Human fetal liver tissue lysate at 10 µg

Lane 2:
HeLa cell lysate at 10 µg

Lane 3:
A431 cell lysate at 10 µg

Lane 4:
A549 cell lysate at 10 µg

Lane 5:
SW480 cell lysate at 10 µg

Predicted band size: 27 kDa

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
