PE Mouse IgG1 monoclonal - Isotype control

Mouse IgG1 isotype control conjugated to PE - suitable for flow cytometry. Clone [TIB9] is a mouse monoclonal isotype control.

Design your panel with our interactive flow cytometry panel builder. Click here.

Key facts

Isotype	IgG1
Host species	Mouse
Conjugation	PE
Excitation/Emission	Ex: 480;565nm, Em: 578nm
Storage buffer	pH: 7.3 Preservative: 0.1% Sodium azide Constituents: PBS, 10% Sucrose, 0.4% BSA
Form	Liquid
Clonality	Monoclonal
Clone number	TIB9
Concentration	0.1 mg/mL The concentration of this product may be batch-dependent Batch concentration finder →
Purification notes	Purified from mouse myeloma useing 0,22 µm filtration

Reactivity data

Application	Flow Cyt
Reactivity	Expected
Dilution info	-
Notes	Nonspecific binding in flow cytometric methods of various diseases.

Storage

Shipped at conditions	Blue Ice
Appropriate short-term storage duration	1-2 weeks
Appropriate short-term storage conditions	+4°C
Appropriate long-term storage conditions	-20°C
Aliquoting information	Upon delivery aliquot

Notes

Reagents should be brought to room temperature (22 ± 3°C) before use.

Product promise

Tested

We have tested this species and application combination and it works. It is covered by our product promise.

Expected

We have not tested this specific species and application combination in-house, but expect it will work. It is covered by our product promise.

Predicted

This species and application combination has not been tested, but we predict it will work based on strong homology. However, this combination is not covered by our product promise.

Not recommended

We do not recommend this combination. It is not covered by our product promise.

We are dedicated to supporting your work with high quality reagents and we are here for you every step of the way should you need us.

In the unlikely event of one of our products not working as expected, you are covered by our product promise.
